Quickstart

Prerequisites

ARM Hangman requires:

- ARMv7 compatible processor and OS

Cloning the Repository

1. Open the terminal and navigate to the directory you want ARM Hangman to be in.
2. Enter the following command:

```
git clone https://github.com/bailee1531/ARMHangman.git
```

Running ARM Hangman

Use these commands to assemble, link, and run ARM Hangman.

```
# Assemble
as -o hangman.o hangman.s

# Link
gcc -o hangman hangman.o

# Run
./hangman
```
